SMARTCODE 10

TOUCHPAD ELECTRONIC DEADBOLT

How to Perform the Door Handing Process
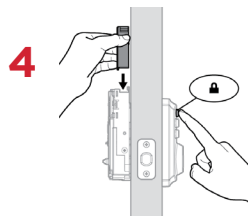

**1** Install 4 AA batteries in battery pack.

2 Make sure the door is open and the latch is extended.

3 Press and hold the Lock button. Do not release.

4 Insert the battery pack and continue holding the Lock button.

5 The latch bolt will retract and extend to learn the locking and unlocking direction of the door. Status LED will indicate success or failure.

Success: LED flashes green

Failure: LED remains solid red

# THE LEADER IN RESIDENTIAL SECURITY

How to Add a Code:

1   Use a phillips screwdriver to remove the 2 set screws on the interior of the lock. Remove cover and set aside.
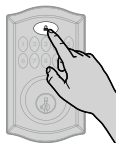

2   Make sure the door is open. Press the round program button that was under the cover you removed.

**3**   Enter new user code. Each user code must be a unique code between 4 and 8 digits.

4   Press the "Lock" button once.

Green (x1)   (x1)   If programming is successful.

Red (x3)   (x3)   If programming is unsuccessful.
