aura

BLUETOOTH KEYPAD SMART LOCK

# How to Perform the Door Handing Process:

1 Install 4 AA batteries in battery pack.

**2** With the door open, install the battery pack to initiate auto-handing.

3 The latch will retract and extend to learn the orientation of the door.
If the bolt does not move, make sure the batteries are correctly installed, the interior assembly is correctly installed onto the mounting plate.

Note: The latch bolt will only retract half way.

4 The Status LED will indicate success or failure.

Green: Door handing was successful. Proceed to next step.

Red: Door handing was unsuccessful. Make sure the lock interior and batteries are correctly installed. Perform step 4B again.

If the door handing process is still unsuccessful after a second attempt, repeat this process again.
